

We are looking for **Junior to Senior Level** highly skilled computer programmers who is comfortable with both front and back-end programming. Full-stack developers are responsible for developing and designing front-end web architecture, ensuring the responsiveness of applications, and working alongside graphic designers for web design features, among other duties. Full-stack developers will be required to see out a project from conception to the final product, requiring good organizational skills and attention to detail.

### **What You'll Do**

- Developing front-end website architecture.
- Designing user interactions on web pages.
- Developing back-end website applications.
- Creating servers and databases for functionality.
- Ensuring cross-platform optimization for mobile phones.
- Ensuring responsiveness of applications.
- Working alongside graphic designers for web design features.
- Seeing through a project from conception to finished product.
- Designing and developing APIs.
- Meeting both technical and consumer needs.
- Staying abreast of developments in web applications and programming languages.

### **What You Need to Qualify**

- A Bachelor's degree in computer science, software engineering, or equivalent practical experience.
- 2 to 5 years of software engineering or software development experience, preferably in a related field.
- Hands-on programming experience in at least one of the following programming languages like Java, Go, .Net, or NodeJS.
- Ability to develop the UI designs provided by the UI/UX designer using the front-end frameworks such as Flutter or React.
- Knowledgeable in databases such as MSSQL, MongoDB, and DynamoDB.
- Experienced in AWS is a plus.
- Strong communication skills, both oral and written.
- Ability to multi-task and deliver in a high-performance environment.
- Ability to debug, identify & optimize code solutions, determine possible solutions, and actively work to resolve the issues using various problem-solving tools and techniques.
- Interest and ability to learn other coding languages as needed.
- Expertise in designing, analyzing, and troubleshooting large-scale distributed system
